Equifax Announces Cybersecurity Incident Involving Consumer Information, Because of Incompetence

---

Equifax should have hosted this on equifax.com with a reputable [EV] SSL Certificate.

Instead they chose an easily impersonated domain and used a jelly-bean SSL cert that any script kiddie can impersonate in 20min.

Their response to this incident leaves millions vulnerable to phishing attacks on copycat sites.

This is why you don't put your security incident website on a domain that looks like a scam (with an Amazon SSL cert).
